

FOR IMMEDIATE RELEASE

November 2009

## **Crystal clear water from your well**

*San Luis Obispo, CA* – Think great tasting water is impossible from your well? Think again. Del Ozone of San Luis Obispo, CA announces the release of its newest product, the Aquaclipse. Del Ozone's proven Eclipse™ ozone technology is now available for well water. The Aquaclipse eliminates the need for chlorine and provides bottled water quality from your source water.

### **Poor water quality and clarity are homeowner's chief complaints about their well water.**

When utilized in well water applications, the Aquaclipse eliminates hydrogen sulfide odor, reduces calcium build-up, improves water quality and clarity, oxidizes organics that affect taste and color and oxidizes iron, copper, manganese and zinc. The National Sanitation Foundation (NSF) says not only is ozone the only sanitizer that is 100% natural and biodegradable but DEL Ozone systems have been tested and proven to kill 99.99% of microorganisms found in water including *E. coli*, *Giardia* and *Cryptosporidium*. Ozone is an Environmental Protection Agency (EPA) recognized antimicrobial.

### **Simple to use and good for the environment**

The Aquaclipse is compactly sized, and weighs less than 35lbs and treats 5,000 gallons a day. This innovative, reliable, high-output corona discharge ozone unit is easy to install on new, existing or multiple atmospheric tanks and there's no plumbing required. The unit is available in both 120 or 240 VAC . Ozone is the healthiest and eco-friendly product you will ever use. With the Aquaclipse, you will enjoy refreshing, crystal clear water that's free of chlorine, chemical byproducts and chemical residue.

### **About DEL**

Established in 1975, DEL Ozone proudly set the standard for ozone usage in zoos and aquariums, pioneered ozone usage in swimming pools and introduced ozone to the spa industry. DEL offers complete product lines for industrial, winery and food safety applications. Consulting with state health department agencies since 1986, DEL also maintains a close working relationship with USEPA, CDC, FDA, USDA and NSF. And with a dedication to the green movement for more than 30 years, DEL proudly offers environmentally friendly products and promotes a global reduction in chemical use.
